

BARRACKS BATHROOM INSPECTION CHECKLIST

Tape this on your door, vanity, or where available, so you're always inspection-ready.

Toilet

- ☐ • Use wipes and clean the bowl; wipe out the sides, including the back and base. It collects dust, even if you think it's not dirty.
- ☐ • Use bowl cleaner and a bleach tablet in the back.
- ☐ • Don't forget to clean the joints where the lid touches the bowl. Grime can hide there.
- ☐ • Make sure paper, scrubber, and anything you would place on the top are in a neat and orderly fashion.

Shower

- ☐ • Keep dry to prevent growth on the curtain. Wipe down walls; if gritty to the touch, then you're not done.
- ☐ • Check under traps and drains; grime builds up in those places.
- ☐ • Keep area clear and free of clothes. Check under soap trays

Sinks/Surfaces

- ☐ • Remove the soap tray and cleaned. Wipe down all the metal and fixtures.
- ☐ • Check under the stopper and behind the faucets for hidden grime.
- ☐ • Check the little drain hole. Hidden gunk lurks there.

Misc

- ☐ • Make sure all laundry/towels/uniform are put away.
- ☐ • Wipe down benches, stools, and any other surface skin would touch. Disinfect.
- ☐ • Check window and door frames. Run your finger over the top; check for dust.
- ☐ • Use products like plug-ins to cover odor if approved.

Trash & Floor

- ☐ • Check floors. Mop/sweep. Remove and clean any fugs and/or mats.
- ☐ • Replace trash bag; check under the bag for gunk or stench before you replace the bag.
- ☐ • Allow time to dry before inspection. Block off all but a stall if needed.
